

ARIF RAHMATH MANZIL

Full-Stack Developer | Python/Django, React & Flutter

Kochi, Kerala, India | +91 9188346836 | arifrahmathmanzil@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Full-stack developer who builds and ships complete products — from Django/DRF/FastAPI backends to React web apps and Flutter mobile apps. Experienced in owning the whole stack: designing PostgreSQL schemas, building REST APIs, and shipping polished front-ends that work for real users. Recently focused on training others in Python, AI/ML, and web fundamentals while delivering academic and client projects end-to-end, from initial design through deployment. Currently seeking full-stack or backend-focused roles building scalable, production-ready applications.

PROFESSIONAL EXPERIENCE

Python Django Developer

Aug 2025 – Mar 2026

KITES Software & Robotics Private Limited, Kochi

- Designed and built 6+ full-stack Django reference applications — including an online note-sharing platform, alumni directory & interaction portal, anonymous campus feedback portal, event management website, hospital management system, and college website — used as teaching material for student cohorts.
- Guided 35+ students through complete project lifecycles (planning, design, development, deployment) using Python and Django, delivering production-ready academic portfolio projects.
- Delivered hands-on training in Python, AI, and Machine Learning, translating core concepts into practical, project-based implementations.
- Led Web Design training covering HTML5, CSS3, and responsive design principles, helping students build user-friendly, mobile-responsive interfaces.

Flutter Development Intern

Jun 2025 – Sep 2025

Futura Labs, Kochi (Remote, Part-Time)

- Completed an intensive Flutter and Dart training program focused on mobile UI development and cross-platform app architecture.
- Built responsive mobile interfaces using Flutter widgets, applying state management principles to handle dynamic UI updates.
- Gained hands-on experience across the full mobile development cycle — UI design, debugging, and deployment.

SKILLS

Languages: Python, JavaScript, Dart

Backend & Frameworks: Django, Django REST Framework, FastAPI

Frontend & Mobile: React, Flutter, Bootstrap, Tailwind CSS

Database & Cloud: PostgreSQL, Firebase, Supabase

Tools: Git

PROJECTS

BeeBlog — Blog Publishing Platform

Apr 2026 – Jun 2026

- Built a blog platform where authors write and publish articles by topic, with a rich-text editor supporting Word-style formatting.
- Backend built with Django; front-end with HTML, CSS, and JavaScript.

Bee Shop — Grocery Booking Platform

Jul 2026 – Present

- Built a grocery reservation platform to address local supply shortages and sellers being forced to discard unsold stock, connecting sellers directly with customers.
- Designed role-based access for Admin, Seller, and Customer with a seller-approval workflow — customers reserve items online, sellers confirm, and customers collect in-store.
- Built with Django, HTML, CSS, and JavaScript; scoped for a future Flutter mobile version.

EDUCATION

Bachelor of Vocation (B.Voc), Software Development

Govt. College of Arts & Science, Kadmat, Lakshadweep • 2022 – 2025
